Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE -3- MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).

Status

- ☒ Responsive to communication(s) filed on 1/16/03

Office Action Summary

Art Unit: 1638

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The amendments of 6 January 2003 and accompanying substitute specification have been entered. Claims 1-3, 5-8, 17-19, 23, 25 and 27 are pending.

The amendments of 6 January 2003 have overcome the outstanding rejections under 35 USC 112, second paragraph; 35 USC 102 and 103.

Claims 1-2, 5-8, 17-19, 23, 25 and 27 remain rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention, as stated on pages 3-5 of the last Office action for claims 1-10, 17-19, 23, 25 and 27.

Claims 1-2, 5-8, 17-19, 23, 25 and 27 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for claims limited to a method for introgressing a gene encoding the large subunit of ADPGPPase from *Lycopersicon hirsutum*, and the use of PCR markers to identify the presence of said *L. hirsutum* gene, does not reasonably provide enablement for claims broadly drawn to any gene from *L. hirsutum* which encodes any product that somehow increases ADPGPPase activity, or for the use of any type of molecular marker to identify said gene. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention

Art Unit: 1638

commensurate in scope with these claims, as stated in the last Office action on pages 5-8 for claims 1-10, 17-19, 23, 25 and 27.

Claim 7 is included in these rejections because it encompasses non-exemplified types of molecular markers of a multitude of sequences, such as RFLPs, SSRs, isozymes, etc.

The amended claims and dependents are deemed free of the prior art, as stated in the last Office action on page 11 for claims 3-6, 8 and 10.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No claim is allowed.

Applicants' arguments filed 6 January 2003, insofar as they pertain to the rejections above, have been fully considered but they are not persuasive.

Applicants urge that the amendments have overcome all rejections including those made under 35 USC 112, first paragraph. The Examiner maintains that the amendment of claim 1 to recite that *Lycopersicon hirsutum* is the source of the introgressed gene *begins* to address the issues raised in the outstanding rejections, as stated in the Interview Summary (paper no. 16). However, claims broadly drawn to any gene from *L. hirsutum* encoding any product which somehow increases the activity of ADPGPPase remain inadequately described, as do a multitude of non-exemplified molecular markers, as stated previously. Furthermore, the unpredictability set forth in the last Office action renders the broad claims non-enabled, particularly in view of the fact

Art Unit: 1638

that Applicants were unable to obtain an increase in ADPGPPase activity when even the *L. hirsutum* gene encoding the *small* subunit of ADPGPPase was introgressed, as stated in the last Office action.

The following amendments would result in allowance of the claims:

Combine claims 1 and 3.

Amend claim 5 to insert --PCR-- before “molecular” in line 2, and replace “gene” in line 2 with --allele--.

Cancel claims 2-3 and 6-7.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
